

**County Executive's Report to Commission**  
**October 13, 2014**

1. One of our administration focus points has been the investment and return on the county's recreation and tourism efforts. As we continue to research and study opportunities for Roane County to capture the tourism dollars, we recognize that the tourism dollar is an outside Roane County dollar that boosts our economy. To that end since filing deadline, I have drafted a letter to the TVA Board of Directors and have scheduled to speak at the next TVA Board meeting related to a private development opportunity for the City of Rockwood at the Tom Fuller Park. I have talked with the city mayor and have been aware of the city's desire for the release of land restrictions at the Tom Fuller Park. To my knowledge, the county has not been involved up to this point. You will have this letter in next month's correspondence and I hope to report back next month on the comments made at the TVA Board of Directors meeting.
2. I have received an email and have talked with our Ambulance Medical Director, Dr. Pat O'Brien, regarding the Roane County Ambulance Service and future directions.
3. Filed a copy of the County's Debt and Capital Reports. We can have a Power Point presentation ready if and when the commission desires a work session on the reports. The reports are also on the county website: [www.roanecountytn.gov/publications](http://www.roanecountytn.gov/publications)
4. We have a presentation ready for activities and projects status for Recreation department.
5. Correspondence #17- report of the Industrial Activity Report. Mr. Woody deferred to Alliance CEO Wade Creswell to address the commission and answer questions about the report.
