

TVA Recommendation

TVA has a recommended procedure to assure fair assignment of available long-term sites and avoid many of the problems we have experienced. TVA recommends: "a lottery entry card that contains the camping unit vehicle number (VIN) and the individual's name should be used as the basis of entry." We will be adopting that system for the 2022 summer camping season.

Warm Season 2022 available long term site assignment

For the warm 2022 camping season the available longer-term sites will be assigned using a lottery.

1. Cards identifying an individual's name and a VIN for the vehicle that would set up will be collected starting March 1.
2. At 8AM on 4/1 the camper cards will be audited and all cards containing the same VIN (duplicate entries) will be removed from the lottery. Available site numbers will then be drawn at random and then paired with a camper card drawn at random. This would proceed until there are no available sites remaining.
3. The results will be posted at the campground and the first month's rent is due within 48 hours.
4. On April 3, at noon, any sites not rented (first month paid) will go back in the hat and another camper card and site number pair are drawn.
5. If a long term site/occupant pair cannot be established during the second drawing, the site is no longer available for longer term rental for the season.
6. Only the camping unit with the correct VIN is allowed to occupy the assigned site.

It is possible that all long-term summer sites will be assigned by random drawing sometime in the future.
